FOR HANDRAILS ON CURVED STAIRCASES

# Measuring guide

An instruction film is available here. If you have any questions, please contact the factory: +46 (0)513-103 70, info@hlf.se.

## 1 Choose your model

Work out which staircase model you have – an L-shaped or a U-shaped stair, and which way it turns.

**Left turn** (L-stair)

**Right turn** (L-stair)

**Left turn** (U-stair)

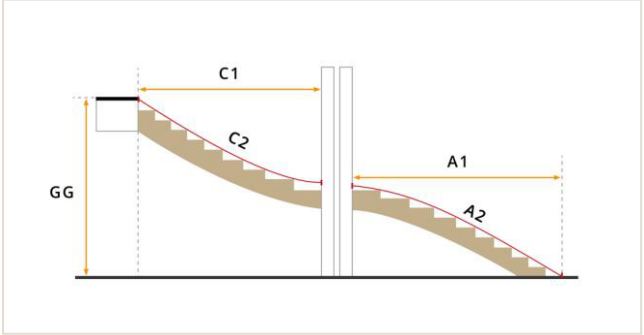
**Right turn** (U-stair)

## 2 Take the measurements

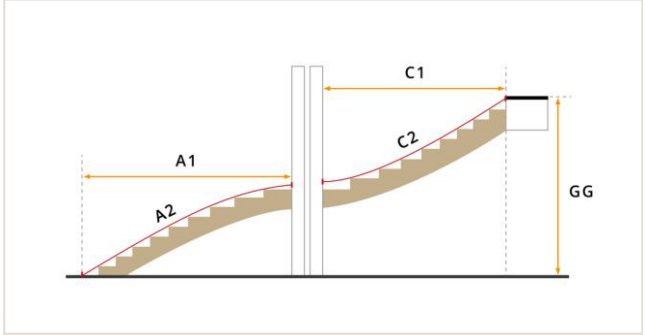
**A1** The horizontal measurement from the point where you want the handrail to start, out to the wall.

**A2** Measured from the same point you chose for A1, but this time you measure on the rake. A tip is to lay a folding rule on the steps and let it follow the string.

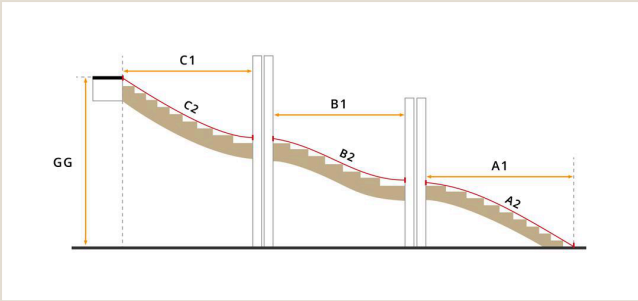
**GG** The length from finished floor on the lower level to finished floor on the upper level.



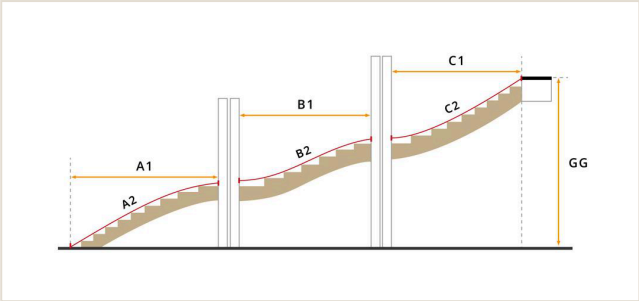
**Left turn** (L-stair)



**Right turn** (L-stair)



**Left turn** (U-stair)



**Right turn** (U-stair)

**All that remains is to place the order in the web shop with the measurements, timber, dimension and finish.**

If you have questions, do not hesitate to contact us at the factory. You can reach us on +46 (0)513-103 70 and info@hlf.se.
